Late in the afternoon troops of the First Marine Div, which this morning captured Wolmi-Do, the island dominating the harbor of Inchon, after heavy Naval and air preparation, successfully landed on the beach of Inchon itself and the beach to the south. They rapidly overcame light resistance and are consolidating the beachhead.

Our losses were light. The clockwork coordination and cooperation between the services was again noteworthy.

In this instance the natural obstacles, combined with the extraordinary tidal conditions, demanded a complete mastery of the technique of amphibian warfare. The command distinguished itself. The whole opn is proceeding on schedule.
